

## **Million Trees Maintenance**

### **Description:**

Responsibilities include weeding around the Million Trees Project trees in the North 40. The trees should have a 1 meter radius cleared around the base of the tree.

We will mostly be using hand held cutters and pulling out the weeds, and the invasive species present is mostly mugwort.

There could be poison ivy and ticks around, so please wear long pants and closed shoes. Gloves will be provided for you

You should bring water as it will be hot.

If you are interested in volunteering, please email [brooke\\_costanza@nps.gov](mailto:brooke_costanza@nps.gov)
